

**SYSTEM, METHOD AND VISUAL
INTERFACE FOR SEARCHING FOR
OBJECTS HAVING MULTIPLE ATTRIBUTES**

ABSTRACT OF THE DISCLOSURE

5 A system, method and visual interface for searching for objects having multiple
attributes. The system, method and visual interface includes one or more target areas for
bid lines represented in a Cartesian coordinate system. The system, method and visual
interface also includes a target line which is representative of a desired or optimal
attribute value. The system, method and visual interface calculates a distance between
10 the target line and the sell bids to determine the closest bid line and hence a desirable sell
bid.
